Mon Feb 01 @07:00PM - 09:00PM

**Turning Spiral Candlesticks on a Scrollsaw ?**

Yes, it's true, Monday night George North will "turn" spiral candlesticks on the scrollsaw. Tonight's class will be the first held at Peachtree Woodworking Supply. Refreshments will be served.

---

Sat Feb 06 @08:00AM - 09:30AM

**Using The Radial Arm Saw**

Ted Baldwin will be making last minute Valentine's Day gifts using the radial arm saw. Ted will show you how easy it is to make earrings from small scraps of wood quickly and safely.

Ted is the master of the radial arm saw. He'll teach you the proper way to operate the radial arm saw safely and along the way you'll see some tricks you may never have thought of.

---

Thu Feb 11 @07:00PM - 09:00PM

**Woodturners Special Interest Group**

Please check here regularly for specifics on upcoming meetings. Our Turners meeting on Thursday February 11 will be "Surface Decoration" presented by Wes Jones. We had a great turnout at our January meeting, thanks, lets do it again.

---

Sat Feb 13 @08:00AM - 09:30AM

**A Guided Tour of the GWA Website**

John Eaton and Paul Proffitt will take you on a guided tour of the new and improved GWA website. Most of you have noticed the web site's new look, but you may not have noticed the new features and functionality. Paul and John will show how to create a user profile and navigate the site. The Gwinnett Woodworkers website is jammed with useful information. This class will make it easier to find and use it.

For those of you that sell your work, Paul Proffitt will also be explaining his new website.

[GeorgiaMadeGeorgiaGrown.com](http://GeorgiaMadeGeorgiaGrown.com) is a new website that promotes Georgia products and allows you to market your work.

---

Tue Feb 16 @10:00AM - 04:00PM

**Your Turn Day**

This will **not** be a typical club demonstration where someone stands in front of the seated group and demonstrates how to turn a Widget. Nor is it a formal class with an instructor. It is more like getting together with a turning buddy in your shop, except with more lathes and more buddies!

The local Atlanta Woodcraft store is generously making their classroom with eight Jet mini lathes and chucks available to us at **no cost** for this session. **Bring your own turning tools and face protection.** You may want to bring a current turning project you are working on or a piece of wood or two. If you are just getting started, you can just bring yourself and a face mask or safety glasses. Woodcraft is also offering a **10% discount** on woodturning related purchases for **GWA participants during the hours of the event.**

Come to learn, come to help teach a new member or just come to watch. All GWA members are welcome.

---

Sat Feb 20 @08:00AM - 09:30AM

**Using The Mini Lathe**

Wayne Martin is known for his award winning baskets and whirligigs, but you probably didn't know Wayne is a turner too. Today Wayne will make a candle stick and base using the mini lathe. In today's class, Wayne will turn his project

using only centers and a faceplate. These are parts that usually come with a lathe when you purchase it. This project will get you turning nice items without the need of an expensive chuck.
